EXPERIENCES

SOORCIN (Full Time), Casablanca — Web developer (10-2022 - 09-2024)

Through my experience at **Soorcin**, I gained expertise in:

E-commerce Solutions : Experienced in building and enhancing single and multi-vendor marketplaces, integrating features like product listings, reservations, and subscription services to optimize user experiences and business growth.

Backend Development : Expert in developing robust and scalable backends, managing server-side logic, and handling database interactions using **Spring Boot, Laravel, and Node.js**.

Front-end Development : Skilled in creating responsive and user-friendly interfaces, optimizing web applications for **speed, accessibility, and cross-device compatibility**. Proficient in **Vue.js, React, Bootstrap, and Tailwind CSS** to craft seamless user experiences.

Database Management : Proficient in designing and optimizing databases, ensuring efficient data storage and retrieval using **MySQL, PostgreSQL**.

CRM Integration : Expertise in integrating **HubSpot API and Dolibarr API** to enhance customer relationship management and streamline business operations.

Payment Processing Integration : Experienced in implementing secure payment gateways, including **Stripe, MangoPay, and CMI**, ensuring seamless and automated transactions.

Shipping Solutions : Integrating logistics solutions like **Boxtal and SendCloud** to automate and optimize shipping processes efficiently.

Real-time Communication : Developing **real-time messaging and notification systems** using **Pusher and WebSocket** to enhance user engagement.

API Integration : Proficient in integrating third-party APIs and developing **custom APIs** for various applications.

WEELITE, (Remotely) — Web developer (05-2022 - 10-2022)

Through my experience at **Weelite**, I gained expertise in:

Front-end Development: Enhancing user interfaces and improving user experiences, including resolving existing design issues and optimizing usability. This also involved ensuring responsive design for optimal viewing across various devices.

WooCommerce Optimization: Improving multiple WooCommerce stores across different sectors, including golf equipment, swim and surf products, and food packaging.

WordPress Development: Building a custom WordPress website for creating and selling plate numbers for cars and motorcycles. This project involved integrating secure payment gateways, such as Stripe and PayPal, for seamless transactions.

Backend Development: Developing server-side applications and handling business logic using technologies like Laravel, node.js.

Database Management: Designing and optimizing databases, focusing on efficient data storage, retrieval, and interaction.

TC EVENTS (Full Time) , Casablanca — Web developer (04-2021 - 05-2022)

Through my experience at **TC Events**, I gained expertise in:

E-commerce Solutions: Developed e-commerce stores for various niches, including shoes, electric toothbrushes, jewelry, cosmetics, makeup, and electric bikes. Utilized WordPress, WooCommerce, and Elementor to create customized, user-friendly online stores. Integrated secure payment gateways, including Stripe and PayPal, to ensure seamless transactions.

Beauty and Wellness Solutions: Created a website for a beauty salon and spa, integrating appointment booking functionality to improve customer convenience.

TC Marketing (Full Time) , Casablanca — Web developer (02-2020 - 09-2020)

Through my experience at **TC Events**, I gained expertise in:

E-commerce Solutions: Developed e-commerce stores dedicated to selling products online using WordPress and WooCommerce. Integrated secure payment gateways like Stripe and PayPal to facilitate seamless transactions.

Corporate and Personal Websites: Developed corporate and personal websites using the Laravel framework, providing robust and scalable solutions for various business needs.

Al-Hikma School (Internship) , Fnideq - Web developer 04-2017 - 05-2017

I created the Al-Hikma Private School website as my graduation project.
